

Project number: 257258

Project acronym: RESTORE

Project title: REsearch into implementation STRategies to support patients of different ORigins and language background in a variety of

E
uropean primary care settings

Starting date: 01/04/2011

Duration in months: 48

Activity code most relevant to the topic: HEALTH.2010.3.1-1: Better understanding of dissemination and implementation strategies. FP7-HEALTH-2010-two-stage

Free keywords: implementation science, normalisation process theory, participatory research strategies, migrant health

Work packages

The overall strategy of our work plan involves eight work packages (WPs), which focuses on different issues:

WP1: Management and Admin

This WP focuses on the management structure of RESTORE at 3 levels:

- the interaction between the co-ordinator and the EU Commission
- the overall co-ordination and management at the Steering Committee level
- the work package management at the WP level

WP2: Training

The objective of this WP is to train consortium partners and researchers about NPT and in PLA approaches and techniques.

WP3: Coherence

The objective of this WP is to determine with stakeholders how they conceptualise guidelines and/or training initiatives designed to support communication in cross-cultural consultations in terms of the role, content and applicability of these guidelines and/or training initiatives in their everyday work settings.

WP4: Cognitive Participation

The objective of this WP is to determine with relevant stakeholders: what factors promote or inhibit their engagement with the training interventions and/or guidelines identified in WP3?

WP5: Collective Action

The objective of this WP is to determine with participants: how will the intervention which they have co-designed and 'signed up' for (during WP3 and WP4) affect their routine work?

WP6: Reflexive Monitoring

The objective of this WP is to determine with participants: how do they perceive the intervention once they have been using it for some time?

WP7: Policy Analysis & Guidelines

The objective of this WP is to conduct a comprehensive analysis of policy issues in RESTORE and to formulate new EU policy guidance.

WP8: Dissemination

The objective of this WP is to promote wide and effective public knowledge of RESTORE and, also, the potential commercial exploitation of the project's results.
